

### POWDERCOATING

Interpon 600 (AKZO NOBEL) is a series of polyester based powder coatings designed for the exterior environment, offering excellent light and weather resistance from a single coat finish on a variety of substrates. The enhanced heat resistance of Interpon 600 powders makes them ideal for use where colour retention on surfaces exposed to continuous heat is required.

Interpon 600 powders are available in a wide range of colours in gloss, satin, matt and textured effects and can be custom matched to the user's requirements. (Only for larger quantities)

### CLEANING

To clean, simply wash mesh, with a mild natural soap (such as a liquid dish detergent) and fresh water, using a soft bristle brush. Rinse and dry with a cloth, to avoid water stains from settling on the stainless steel frames.

### SPECIAL PERFORMANCES

- UV and weather resistant
- Water (salt and chlorine) and moisture resistant
- Non toxic and environmental friendly
- Strong and durable
- Easy maintenance
